

David Ng'uono Ochiel

Full-stack Software Engineer

✉ ngunodave@gmail.com ☎ 0742337780 📍 Kenya 🌐 github.com/ngunodave

Summary

Full-stack apprentice software engineer with 1–2 years of experience building scalable web applications. Proficient in HTML5, CSS3, JavaScript, React/Next.js, and Golang, with a strong focus on responsive UI design, backend scalability, and performance optimization. Experienced in debugging, testing, and collaborating with teams to solve technical challenges and deliver high-performance solutions, as well as updating and optimizing existing websites to improve performance and user experience.

Skills

Languages, Web, and DB – HTML5, CSS3, JavaScript (ES6), Golang, Python, MySQL, PostgreSQL, SQLite

Libraries & Frameworks – Django, Angular, TailwindCSS

API Development – RESTful, GraphQL

Tools & Platforms – Git, Github, Netlify, Vercel, PythonAnywhere, Render

Soft Skills – Communication, teamwork, problem-solving, leadership, flexibility, ability to work independently

Relevant Experience

Software Engineer, @ Synergy Informatics 01/2026 – Present | Kisumu, Kenya

- Build and scale med-tech solutions that improve healthcare workflows and outcomes.
- Design reliable, high-performance systems with clean, maintainable code.
- Collaborate across teams to deliver user-centered solutions and drive continuous improvement.
- Continuously improve development processes and drive high-impact innovation.

Apprentice Software Engineer, @ Zone01 Kisumu 01/2025 – 10/2025 | Kisumu, Kenya

- Collaborating on projects with a focus on clean, efficient, and well-documented code.
- Enhancing troubleshooting and debugging to ensure performance, security, responsiveness, and reliability.
- Developing and maintaining server-side applications and scalable APIs with cross-functional teams.
- Improving version control systems skills with Git for seamless collaboration and efficient code management.

Intern, @ Synergy Informatics 02/2022 – 03/2022 | Kisumu, Kenya

- Performed QA, testing, and debugging to ensure proper website functionality and resolve issues.
- Built a custom CMS with HTML, CSS, JavaScript, and Django for easy website content management.

Project Highlights

Spark Bridge

- A Django web app connecting customers with service providers for services and maintenance tasks.

Obesity Predictor

- Performed EDA to identify key obesity predictors and gain insights from the dataset.
- Implemented a Decision Tree classifier to predict obesity rates based on physical and health factors.

Personal Website (v2)

- Second version of my portfolio website built with React.

Education

Bachelor's Degree in Computer Science,
South Eastern Kenya University

08/2019 – 04/2023 | Kitui, Kenya
